Career Objective

Curious and motivated AI & ML undergraduate with strong problem-solving skills and a passion for learning emerging technologies. Seeking opportunities to apply Python and AI knowledge while continuously growing through real-world challenges and collaborative innovation.

Education

Bachelor of Engineering – Computer Science Engineering (Artificial Intelligence & Machine Learning)
Chitkara University | 2024 – 2028
CGPA: 9.66 / 10.00

Technical Skills

Programming Languages: Python, Java, SQL, C++
Artificial Intelligence & Machine Learning: Machine Learning, Computer Vision, OpenCV, PyTorch, OCR (Tesseract), NumPy, Pandas, Scikit-learn, XGBoost
Frameworks & Web Technologies: Django, Flask, HTML, CSS, REST APIs
Databases: SQLite, MySQL
Developer Tools: Git, GitHub, VS Code, Eclipse, Postman, Ollama
Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

---

Projects

AI-Based Smart Attendance System (Team Project) (Python, Django, OpenCV, SQLite, JWT, QR Code)

- Developed a secure attendance system integrating dynamic QR authentication, face recognition, and liveness detection (blink & head movement) with role-based modules for students, faculty, and administrators.
- Implemented attendance analytics, automated notifications, JWT-based authentication, and database management using Django, SQLite, and OpenCV**.**

Machine Learning-Based Rice Yield Prediction (Individual Project) (Python, Scikit-learn, XGBoost, Pandas)

- Built an end-to-end machine learning pipeline for rice yield prediction by performing data preprocessing, feature engineering, and exploratory data analysis on agricultural and rainfall datasets.
- Trained and evaluated Linear Regression, Random Forest, and XGBoost models using R^2, RMSE, and MAE, selecting the best-performing model for prediction.

Medicine OCR & AI Precaution Assistant (Individual Project) (Python, Flask,Tesseract OCR,RxNorm API,Ollama)

- Developed a Flask application that extracts medicine names from uploaded images using Tesseract OCR and standardizes them through the RxNorm API.
- Integrated Ollama (Llama 3.2) to generate AI-assisted precaution summaries and designed a responsive interface for automated medicine information retrieval**.**

Furniture E-Commerce Platform (Team Project) (Python, Django, SQLite, HTML, CSS)

- Developed a role-based furniture e-commerce platform with buyer and seller modules, including authentication, product management, cart, wishlist, order tracking, and rental services.
- Designed backend architecture using Django ORM and SQLite, implementing scalable database models, search functionality, and seller dashboards.

Experience

Technical Executive – SCRS | May 2025 – Present

- Organized technical activities, collaborated on development initiative

---

Certifications

- Microsoft Azure AI-900: AI Fundamentals
- Microsoft Azure DP-900: Data Fundamentals
- Microsoft Azure AZ-900: Azure Fundamentals

Achievements

- Best Technical Implementation Award – Smart Attendance System Hackathon
- Participant – Fusion Fest Hackathon
- Developed multiple AI/ML, Computer Vision, and Python-based applications.
- Active learner of Data Structures & Algorithms and problem solving.
